

## XTRAPROTECT CLEANS, SANITISES & PROTECTS ALL SURFACES AND HANDS

- XtraProtect is a multi-purpose sanitiser that is British Laboratory Tested on hands and surfaces to kill and protect against 99.99% of bacteria and enveloped viruses including coronavirus. Tested to British Standards BSEN 14476 & BSEN 1276 – non-toxic / anti-bacterial / anti-viral / bio-degradable.
- XtraProtect Hand & Touch Point Sanitiser can be used as both a hand and touch point sanitiser in the home, at work, in the car, at the gym – anywhere you go and anything you touch.
- XtraProtect is a water based antimicrobial solution whose active ingredients have been approved for use on surfaces and the skin under the European Biocide Regulation. XtraProtect does not use aggressive chemicals, alcohol or bleach and is non-toxic and biodegradable. The XtraRange are accredited as Ethical Products and Ethical Brand by the Good Shopping Guide.
- Normal sanitisers contain 60 – 80% alcohol. This type of formulation is only effective when used on clean hands. If used on soiled hands the effect of the alcohol can be reduced by more than 50%.
- XtraProtect sanitises and forms an antimicrobial coating on a surface, which continues to protect against viruses and bacteria even when dry.
- XtraProtect has been used in nursing homes for several years with only positive results, this area of personal care is rigorously and regularly inspected and we have only had praise for the product and it's result for inhibiting the spread of infections.
- The bottles are made from recycled or recyclable plastics with recyclable and reusable trigger sprays.
