

XTRAFood SAFE

KITCHEN & FOOD PREP AREA CLEANER

XtraFood Safe sanitiser was primarily developed for use in Food Preparation areas (Worktops, Equipment etc) and where Hygiene standards are paramount. XtraFood Safe is a QAC free, Non-toxic, Bio-based Sanitiser that requires NO RINSING after cleaning. XtraFood Safe is approved under the European Biocide regulation and has been approved to BS EN1276 standards. Unlike many other food hygiene chemicals, XtraFood Safe works after only 30 seconds of contact time removing harmful germs from surfaces, and leaving NO RESIDUE. It can also be used in environments that require lower temperatures.

The added bonus with XtraFood Safe is – as the process requires NO RINSING this will eliminate operator error (which could cause cross-contamination of surfaces) thus giving huge confidence to Business Managers/Owners, Staff and Guests.

FAQs

- **Where can this product be predominantly used?** XtraFood Safe is used in Food Preparation areas and where rinsing is not available. This product can also substitute washing up liquid and can be used in dishwashers.
- **Where should you not use this product?** This product is safe for use in all areas.
- **Why is this product different from others on the market?** There are no aggressive chemicals in this product. The product works with only a 30 second contact time and does not require rinsing.
- **Why is this product eco-friendly?** This product is QAC free, Non-Toxic, Biodegradable and leaves no residues. It is recognised as an Ethical brand by the Good Shopping Guide.
- **What is the packaging made from?** The bottles are made from recycled plastics with recycled and reusable trigger sprays.
